MESSAGE

Dear Friends,
Greetings from The Paradise Group of Institutions.

We are drawing close to the completion of the current academic year. We need to constantly remind ourselves that God has bestowed upon us abundant talents and gifts, which remain with us throughout our lives. What is important is how we recognize them and take steps to grow and strengthen ourselves. The more we explore and act, we will indeed realise the abundance that is within us. Let us continue to recognize, strengthen and be grateful to God for all of them.

I congratulate our dear Paradines for the application of innovative and experiential selves to exhibit the best during the well-organised The Paradise Innovator 2026. I do appreciate your hard work and the support of our ever-dedicated teaching community and leadership team for the constant effort to motivate students and the teachers to bring out their best. Kudos to you all!

Dear students, we wish you best of luck for your annual examination. Remember, hard work always pays and therefore, there's no need for tension; apply yourselves and you will surely perform to your best of abilities judged by the degree of hard work you have put in throughout the academic year 2025-26.

With Best Regards,
Dr. S. Isias
Dean

MESSAGE

Dear Paradise Family, as we turn the pages of another vibrant chapter in our school's journey, I invite you to pause and reflect on the profound truth that each of us carries within us God given gifts. These are not mere talents hidden away like treasures in a chest, but living strengths bestowed upon us by the Creator to illuminate our paths, uplift our community, and propel us toward greatness. We celebrate these divine endowments as the very foundation of our strength, especially when we harness them through the spark of innovation. Think of innovation not as a distant, high-tech buzzword reserved for inventors in gleaming labs, but as the everyday courage to reimagine, adapt, and create. It is the student who transforms a simple science experiment into a sustainable model for our school garden, turning curiosity into conservation. It is the teacher who innovates lesson plans by weaving storytelling with digital tools, making history come alive for young minds. It is the parent who innovates family study routines, blending tradition with modern apps to nurture a child's unique gift for mathematics or music. These acts remind us that our God-given gifts, be it creativity, empathy, resilience, or analytical prowess gain true strength only when we innovate with them. It requires faith-fuelled discipline and collaboration. When we view our strengths as divine trusts, we steward them responsibly, experimenting boldly yet humbly, learning from failures as stepping stones, and sharing successes to multiply joy. Let this inspire us at Paradise, adapting innovation in academics by blending rote learning with creative problem solving. Events like The Paradise Innovators Expo truly unleash these gifts of scientific temper in our students, transforming Paradise School into a beacon of excellence and inspiration. May the Divine help us to recognise these gifts, give us the courage to innovate with them, and grant us the grace to use them.

Mr.Rajkumar Singnal

Rainbow Day Celebration

Rainbow Day was celebrated with great enthusiasm on 2nd February 2026. All the children came dressed in beautiful rainbow-coloured attire, making the campus bright and colourful.

The students actively participated in fun-filled group activities conducted in their classrooms. The day was filled with joy, laughter, and excitement. A wonderful photo session was also organized, capturing the cheerful moments of our little stars.

It was truly a vibrant and memorable day for everyone!

Assessing Growth and Excellence

The students of Grades VIII and IX commenced their Annual Examinations on 2 February 2026, marking a critical benchmark in students' academic progress as they prepare to transition into their board-examination years.

For Grade VIII, the examinations focused on strengthening and assessing foundational concepts in alignment with the latest ICSE guidelines, ensuring that students have achieved the required proficiency levels for promotion to the senior secondary stage. Meanwhile, the Grade IX assessments were structured to closely mirror the Board Examination pattern. The question papers incorporated objective-type questions, source-based analysis, and HigherOrder Thinking Skills (HOTS) to develop the analytical ability, stamina, and academic rigor required for success in Grade X.

The final results were calculated as a weighted composite of the written annual theory examinations, periodic assessments, and subject enrichment activities such as practicals and projects, ensuring a comprehensive evaluation of each student's performance.

Together Towards Victory

Our Grade V students participated in the Interschool Sports Competition (Under-10 category) held on 5 February 2026 at The Paradise International School. The Grade V boys showcased excellent teamwork and emerged as winners in the football event. The Grade V girls also performed wonderfully in throwball and secured the runners-up position.

Sports play an important role in a student's life. They help improve physical fitness, teamwork, discipline, and confidence. Participating in sports teaches children the value of hard work, leadership, and sportsmanship.

Kudos to all the participants for their dedication and outstanding achievements!

Little Stars on the big stage

Our Grade I Little Stars of Salvia conducted their special assembly on 6 February 2026 with great enthusiasm. The event began with a welcome dance, followed by a welcome speech. The Thought for the Day, News, and Amazing Facts were presented confidently and clearly. The quiz made everyone think and reflect. The uses of computer applications were explained well, and Kannada and Hindi songs were beautifully presented. Our Principal, Mr. Rajkumar Singnal, addressed the gathering and conveyed his best wishes to our young learners. Finally, the assembly concluded with a vibrant dance performance. The event truly showcased the confidence and talent of our young learners.

Collaborating With Parents

We hosted a dynamic orientation session for the parents of upcoming batch of Grades IX and X students on 14 February 2026, in order to guide and direct the senior Paradines and emphasising the collaborative nature of the teachers and parents for optimum benefit to the students. The programme focused on bridging the gap between foundational learning and the rigorous demands of the ICSE Board examinations, emphasizing a “holistic yet high-performance” approach.

Faculty members outlined the strategic curriculum, which prioritizes conceptual clarity and critical thinking over rote learning, ensuring that students are well-prepared for both internal assessments and national benchmarks. Special emphasis was placed on discipline and the school’s core values, fostering a conducive environment for focused learning.

The session also included a detailed breakdown of the syllabus for the 2026–27 academic year, along with a structured timeline for completing the curriculum well in advance, allowing ample time for revision and preparation for examination.

A Memorable Grand Finale

The last but not the least Special Assembly of Grade I Tulip was conducted on 16 February 2026 with great enthusiasm. The event began with a graceful welcome dance, followed by a warm welcome speech. The Thought for the Day, news, amazing facts, and quiz were presented confidently by the students. Tongue twisters, a Kannada performance, and a Math skit beautifully highlighted the assembly and showcased the children's talents. Each special assembly helps in building confidence among students, reveals their hidden talents, and brings great satisfaction to the teachers. The programme concluded with a vibrant dance performance, and everyone posed for a final photograph with bright smiles, making it a memorable event for all.

The Philosophy of Restorative Innovation

At the heart of the Science Expo 2026 exhibited on 27 February 2026, was the concept of the "Paradise Innovator." In 2026, the scientific community has shifted its focus away from "growth at any cost" toward "restoration by design." The projects showcased this year reflect a profound realization: true progress is measured by how much of our natural "paradise" we can reclaim using modern tools.

The Paradise Innovator Expo 2026 proved that science is no longer a cold, sterile pursuit. By empowering the next generation of thinkers to build with a "restoration-first" mindset, the expo has shown that the "paradise" we often look for in the past is actually something we can engineer for the future. The Paradise Innovator Expo 2026 has emerged as a premier highlight of the scientific calendar, specifically designed to showcase the "restorative technology" movement. Unlike standard exhibitions, this event focused on the intersection of cutting-edge AI, clean energy, and environmental healing, tasking participants with creating solutions that aim to return the planet to a state of ecological "paradise."

A significant portion of the expo was dedicated to the Startup Paradise Hub, which features high-impact projects such as autonomous reef-restoration drones and atmospheric water harvesters. By blending the experimental energy of youth-led innovation with professional deep-tech showcases, the 2026 Expo served as a vital platform for engineering a sustainable and technologically harmonious future.

Digital Safety and Empowerment

The School hosted an impactful awareness drive on 25 February 2026 on the theme of digital safety and empowerment, which was led by the Rani Chennamma Pade, a specialized all-women police squad dedicated to the protection of women and children. The officers delivered a powerful session that bridged the gap between physical and virtual security, focusing heavily on digital fraud and the rising threats of cyber-stalking and financial scams. By explaining the tactics used to identity theft and social engineering, the squad empowered female students and staff to navigate the digital landscape with skepticism and confidence. The drive highlighted that safety isn't just about physical vigilance in public spaces, but also about securing one's digital identity through two-factor authentication and cautious sharing.

The presence of an all-women force like the Rani Chennamma Pade provided a relatable and approachable environment for students to voice their concerns. Their mission at The Paradise was clear: to ensure that every girl feels she has a shield both on the street and on her or parents' smartphone.

The Paradise

Annual Examinations are very easy for the minds that have put in the hard work throughout the year in the classroom and in the school and of course, burning the midnight lamp at home.

Evaluation is a tool to test one's readiness to learn and how this readiness has created an impact in learning.

We wish best of luck to every one of you for the Annual Examination 2026.

ALL THE VERY BEST
